

Experience API Services

from [SALTBOX]

Saltbox is a major contributor to the Experience API standard since 2012. We've developed the leading Learning Record Store technology (Wax LRS) and we've walked in your shoes as an L&D leader.

This is why Fortune 500 companies partner with us to develop strategic roadmaps for Experience API planning, implementation, and support.

Don't just take our word for it...

"When my organization decided to transform itself from a traditional brick & mortar retailer into an omnichannel innovator, it was clear to me that we needed a paradigm-changing learning strategy and cutting edge technology to support it. Saltbox has been a tremendous partner for us in making this strategy a reality. It helped us turn a rigid 250,000 employee compliance training organization into a more agile continuous learning culture"

-VP of Learning, Fortune 100 Retailer

We can help at a high level...

Experience API Strategy

You need to better align L&D with the business, align activities to better understand workforce readiness, and your LMS is not enough. You know the Experience API (xAPI) can help, but you're not sure how to get started.

Our services:

- Learning Model Identification
- Competency Mapping
- System Integration Assessment
- xAPI Architecture Design
- On-site Training & Info Gathering

Learning Model Canvas

We've done this before. Successfully.

"Saltbox helped my team better understand our current approach to training and learning. Using the Learning Model Canvas helped us identify where we would like to go to support the organization's overall strategy and gave us some great recommendations for how to start moving along that path."

-Amanda Zehnder, Director of Learning, PATH

...or get into the weeds!

Experience API Design & Implementation

You need to accelerate your xAPI development and leverage our experience. You've defined business outcomes, but want to map them to the right learning experiences, systems, and events. You're ready to get going.

Our services:

- Business Outcome Mapping
- Connectors & Integrations
- Statement Design Templates
- Custom Reporting & Analysis
- Learning Record Store Setup

“We help L&D better support, understand, and improve employee readiness. The xAPI is just a tool behind the scenes”

-John Delano, CEO Saltbox

The Saltbox Methodology

Get started with [SALTBOX]

Take the first step in your xAPI journey with us

Don't go it alone. Leverage our enterprise L&D experience and deep knowledge of the Experience API to exceed your organizational goals.
